

Gain the leadership, team building and project management skills necessary to lead teams and organizations, manage change and stay current in the technology industry.

The Master of Professional Studies in Technology Management program at Georgetown shows skilled professionals how to be the most effective technology managers and leaders in the industry. You can choose the flexible part time schedule, which allows you to study at your pace and can be completed within two years, or choose the accelerated schedule for motivated individuals looking to make an impact in their organization within one year. With two options, we are certain that you will find a schedule that will enable you to achieve your personal and professional goals in a time frame that fits your life.

FEATURES OF THE PROGRAM

- A focus on management and business
- Flexible format for working professionals
- Curriculum aligned with current issues
- Classes conveniently located near Metro
