Cyberethics

Spring Semester, 2016, Thursdays, 6:30-9:30 PM
January 14, 2016-April 21, 2016 (No class on March 10 or March 24, 2016)

Classroom Location: ICC 208A

Faculty: Gladys B. White, Ph.D.
Adjunct Professor of Liberal Studies
Gladys.White@comcast.net

Course Description

The wide range of human activities now taking place in cyberspace raises classic as well as novel ethical, legal and social issues. Social media such as Facebook and Twitter and many issues related to the active presence of the internet in general, have outstripped the bounds of any moral consensus or U.S. case law related to property, privacy and confidentiality for example. In addition, there is a growing body of information about harms and abuses that take place in cyberspace. Cybercrime and the possibility of cyber attack have galvanized both governments and citizens of the world. This course approaches these issues as areas of inquiry within philosophical ethics. It begins with basic information about ethical theories and principles and then proceeds to an examination of the various cyber modalities, one by one. Careful analysis of the relevant ethical issues including the development of ethical arguments will shed light on the question of how should we respond to the opportunities and challenges presented in cyberspace? In addition, legal cases that do exist will be considered. The course will have a strong values component, a global orientation and also provide ample opportunity for creative thought and active participation on the part of students.
Learning Goals and Outcomes

At the conclusion of this course, students should be able to:

1. Identify and describe the ways in which activities in cyberspace enhance or challenge what it means to be human and a member of the human community;

2. Analyze the ways in which ethical principles and theories offer normative direction for activities in cyberspace;

3. Create strategies for the maintenance of civility in cyberspace;

4. Compare and contrast the impact of social networking for various age groups at different developmental stages with emphasis on both freedom of speech and privacy;

5. Specify the ways in which the internet and online activities can promote justice and respect for human rights with an adequate consideration of what it means for some groups to be essentially disenfranchised due to lack of internet access;

6. Identify common types of cybercrime and describe the implications of internet use for statecraft and global policy development.

Course Outline

February 4, 2016 Case studies Paper 1 is due.

February 18, 2016 Case studies

March 3, 2016 Case studies

April 7, 2016 Case studies

April 14, 2016 Cyber Attack, Cyber Warfare, Clarke, Richard and Knake, Robert K. Cyber War, The Next Threat to National Security and What to Do About It (see optional texts)

April 21, 2016 Paper 2 is due. Course evaluation and Wrap-up.

Required Texts

Additional handouts and audiovisual materials will be provided by the professor.
Optional Texts

Course Requirements

Students will be required to submit two short papers of approximately 8-10 pages each. The focus of these papers will be a proposed innovation in law and ethics intended to protect the public from harm, ensure civility in cyberspace and safeguard personal privacy. The student may select to focus on the Internet in general or on specific modalities such as Facebook, My Space or Twitter, for example. Papers are to be submitted in hard copy only. In addition, each student is expected to present and analyze one case study from the assigned readings during classes designated for this purpose. Students should attend each class and actively participate in class discussions. Each paper will equal 30% of the grade (60% total) and class participation including the case presentation will equal 40% of the grade. Points will be deducted for work turned in after due dates.
Citation System

Students may use APA style, MLA style or Turabian for documenting the sources and quotations used in their written work as long as the chosen style is used consistently throughout a particular paper.

Student Attendance

Student attendance is expected at all meetings of the course. If a student misses more than one class session, he or she will be dropped from the course. Students are expected and encouraged to arrive to class on time.

Every attempt will be made to ensure instructional continuity in the case of any interruption in face-to-face instruction due for example to a weather emergency. In these instances, students should consult the Black Board course page to determine how they should work on the lecture topic that evening during the time period already reserved for the class. Instructions will be forthcoming, actual feedback will be given and interactions encouraged during the class period.

Incomplete Grades

Incomplete grades are not allowed in this course except in circumstances of extreme personal emergency. If an incomplete grade is granted, due dates and arrangements for completion of course work will be established by the professor in consultation with the student.

Classroom Behavior

During class, students are expected to refrain from the use of laptops and cell phones that is not related to course material. Violation of this rule will lead to the student being instructed to leave class, resulting in a recorded absence.

Recording class sessions without the instructor’s permission is not permitted. The Code of Students Conduct governs acceptable classroom behavior.
Academic Integrity

Without regard to motive, student conduct that is academically dishonest, evidences lack of academic integrity or trustworthiness, or unfairly impinges on the intellectual rights and privileges or others is prohibited. A non-exhaustive list of prohibited conduct includes: cheating on exams and other assignments, committing plagiarism, using false citations, submitting work for multiple purposes, submitting false data, falsifying academic documentation, abuse of library privileges, and abuse of shared electronic media. The Honor System includes detailed provisions for investigating and adjudicating allegations of academic misconduct. Further information is available at http://gervaseprograms.georgetown.edu/hc/.

MALs and DLS students are responsible for upholding the Georgetown University Honor system and adhering to the academic standards included in the Honor Code Pledge stated below:

In the pursuit of the high ideals and rigorous standards of academic life, I commit myself to respect and uphold the Georgetown University Honor System: To be honest in any academic endeavor: and to conduct myself honorably, as a responsible member of the Georgetown community, as we live and work together.

Disability Notice

Please note: If you believe that you have a disability, then you should contact the Academic Resource Center (arc@georgetown.edu) for further information. The Center is located in the Leavey Center, Suite 335. The Academic Resource Center is the campus office responsible for reviewing documentation provided by students with disabilities and for determining reasonable accommodations in accordance with the American with Disabilities Act (ADA) and University policies.
